From Process Components to Complete Systems

- Sanitary Hoses and fittings
- Premium Flexible Hoses

- Rotary Impingement Tank & Vessel Cleaning Machines
- Mobile, Self Contained CIP Systems

Custom ultra-corrugated and coil tubular heat exchangers built for sanitary food, beverage, and pharmaceutical processing.

- Sanitary, Low Shear, Twin Screw Positive Displacement Pumps
- Powder Induction Systems for High & Low Viscosity Liquids
- Continuous Blending Systems - Auger & Hopper Feed Systems
- High Shear Mixers

- AC Motors - Servo Motors
- DC Motors - EC Motors

- Precision Metering Pumps - Continuous Blending Systems
- Packed Plunger & Diaphragm Metering Pumps

- Sanitary Pressure & Temperature Gauges/ Transmitters
- Digital & Bimetal Thermometers
- RTDs & Sanitary Thermowells

- Quality Stainless Steel Piping Components

- Level, Flow, Pressure & Temperature Gauges/ Transmitters
- Density and Viscosity Measurement

Endress+Hauser

- Level, Flow, Pressure & Temperature Instruments & Controls
- PH & Conductivity Analyzers

- Pharmaceutical & Biotech Tanks
- Tubular Heat Exchangers & Pasteurizers
- ASME Coded Vessels & Sanitary Tanks

- Rotary & Sliding Stem Valves
- Actuators Steam Control Valves & Regulators

FLORIDA 9404 E. Broadway Ave
Tampa, FL 33619
(813) 626-1283 Fax: (813) 623-1347

GEORGIA 1955 Vaughn Rd- Suite 103
Kennesaw, GA 30144
(770) 795-1195 Fax: (770) 795-1342

- Sanitary Positive Displacement & Centrifugal Pumps
- High Shear In-line Mixers - Continuous Blend Systems

- Tuchenhausen Sanitary Valves

- Position Sensors & Proximity Switches
- Flow, Pressure and Level Sensors

- Sanitary & Industrial Control Valves
- High Performance Butterfly Valves

- Sanitary Air Diaphragm Pumps & Systems
- Drum & Tote Unloading Systems

- Sudmo Sanitary & Aseptic Valves & Fittings
- Haffmans CO2 Analysis & Recovery Systems
- Norit Water Treatment & Membrane Technology

Advanced direct steam injection heater that heats water, liquids, or slurries instantly and uniformly in-line. It achieves 100% energy transfer while preventing steam hammer and maintaining precise temperature control.

- Multitalent Mixing Solutions for Food, Beverage & Pharmaceutical Industries
- Sanitary, Magnetic Drive, Bottom Entry Mixers & Stirrers
- Coaxial Agitators & Customized Blenders

High-shear rotor/stator industrial mixer designed to rapidly mix, emulsify, homogenize, and disintegrate solids in liquid solutions.

ITT Flow Technologies / SPX Flow is a global leader in highly engineered process technologies. They provide critical systems for fluid handling, mixing, and thermal transfer for the sanitary, industrial, chemical, energy, and nutrition markets.

Manufacturer of sanitary and high-purity stainless steel fittings, gaskets, valves, and processing equipment. They specialize in standard catalog items and custom fabrication for strict hygienic industries like food, beverage, dairy, and pharmaceuticals.

Manufacturers of high-efficiency sanitary and industrial heat exchangers—including gasketed plate heat exchangers, tubular, and shell-and-tube models—engineered for superior thermal performance, food-grade safety, and easy cleaning in demanding beverage, dairy, and chemical processes.

- Sanitary & Industrial Hose & Hose Assemblies
- Stainless Steel Braided Steam Hoses & Expansion Joints

- Sanitary & Industrial Centrifugal & Rotary Pumps, Valves & Fitting Scraper
- Surface Heat Exchangers/ Votator

We Can Handle Any of Your Equipment, Instrumentation and Control Needs!

From process components and repair parts to valve manifold and complete integrated systems

CALL TO SPEAK WITH YOUR LOCAL REPRESENTATIVE

(800)-889-5699

Process Technologies, Inc. welcomes the opportunity to discuss solutions to process problems with potential customers without obligation. We provide chemical, mechanical and electrical engineering assistance as a sales tool for purpose of better serving our customer needs.
